

For Visitor Safety

To help ensure the health and safety of all visitors to Particle Technology Labs, we ask that you take a few minutes to review the following information prior to your visit of our facility.

In order to be permitted to enter the laboratory where hazardous chemicals may be present, open-toed shoes are not permitted and eye protection must be worn at all times. Disposable safety glasses are available to all visitors. Prescription glasses are also considered acceptable eye protection.

Should you have any particular allergies or health concerns please notify your host before entering the laboratory. Please be aware of possible allergens that may be present in the laboratory. These include, but are not limited to:

- Antibiotics
- Nuts/Nut Oils
- Wheat/Flour
- Dairy Powders that include Milk, Lactose or Whey

We would be happy to address any additional safety questions you may have prior to your visit. Please feel free to contact us at any time.
